

BMOR Self-Assessment Quiz

Interest categories/Personalities

Group 1: Creative

Arts:

You're very creative and have an eye for art and design. Explore your creative side with art classes and learn more about amazing artists of the past in your history classes.

Writing:

You're smart, creative, and enjoy writing. In addition to taking English and creative writing classes that will help you practice your skills, join the school newspaper or submit your work to your high school's literary magazine.

Fashion:

You are stylish from head to toe. You don't just follow the latest trends--you start your own. Make sure you pay attention in geometry, which will help you when you measure and create patterns. You could join (or start!) a fashion club at your school.

Entertainment:

You have a colorful way of expressing yourself--people love to hear you tell stories. Join the drama club, glee club, or choir to explore your creative side. And participate in your English class where you'll read, and possibly even act out, plays and stories.

Music:

You've got a love of music and an ear for quality. Did you know that having a solid understanding of math will help you read sheet music? Pick up an instrument and take music lessons or join your school's band. Maybe even start a band of your own!

Culinary:

You like to experiment in the kitchen, and have been known to whip up something remarkable for dinner. Volunteer to bake treats for your school's bake sale, and make sure you stay awake during math class (to help you measure when cooking!)

Group 2: Analytical

Working with your Hands:

You enjoy figuring out how things work and working with your hands. Sign up for your school's shop class and learn how to build and assemble different things. Be sure to also pay close attention during geometry and physics, which will come in handy when you're being handy!

Health & Wellness:

You are very intelligent, practical, and organized. You also really love helping people feel good and stay healthy. Biology class is a great way to understand how the body works and how nutrition impacts the way you feel.

Technology:

You are logical and analytical. You love to check out the latest gadgets and technology. Sure, you probably rock your computer class, but make sure you pay attention during science and math because the skills you'll learn there will help you, too.

Business/Finance:

You love meeting new people and have a great ability to manage money and finances. You love the idea of taking a small amount of money, and using your skills and network, growing it into a bigger amount.

Nature:

You are happiest when you are outdoors and enjoying nature. Wouldn't it be great if you could be outside all day, every day? Your high school ecology and biology classes will teach you about animals, nature and our ecosystem.

Public Service:

You love meeting new people and dream that you will make the world a better place. History and social studies classes are a great way to learn about how others have made an impact. Take what you've learned and volunteer for programs through your high school.

0. Are you more interested in how things look or how things work?

Creative: How things look.

Analytical: How things work.

1. Let's pretend your entire GPA depended on one assignment, but you get to pick which one. Which one of these would you choose to do?

Group 1:

Arts: Drawing or doodling.
Writing: Writing in my journal.
Fashion: Shopping.
Entertainment: Make a YouTube video.
Music: Play some music.
Culinary: Eat my favorite foods.

Group 2:

Working with your Hands: Working on a car engine.
Health & Wellness: Going for a run.
Technology: Playing a video game.
Business/Finance: Work. It might sound weird, but it's a good distraction.
Nature: I take a walk outside.
Public Service: I try and put it in perspective, others have it so much harder!

7. If you were on a deserted island, and the basic survival stuff was taken care of (food, clothing, water, shelter), which of these things would you bring with you?

Group 1:

Arts: Art supplies.
Writing: Books, and lots of them!

Fashion: Island-inspired clothing, I have to look the part.
Entertainment: A TV with satellite and a Blu-ray player.
Music: An instrument and my mp3 player.
Culinary: Basic food may be provided, but I want a supply of my favorites!

Group 2:

Working with your Hands: Wood and rope so I could build a raft, duh.
Health & Wellness: Medical supplies.
Technology: A satellite phone so I could call for help or play Angry Birds.
Business/Finance: A metal detector, maybe I can find some buried treasure.
Nature: Nothing. Being one with nature sounds like a dream!
Public Service: My friend, so I have company.

8. In college, you get to choose the classes you want to take and focus your education on what you're interested in. Which of these college classes would you be most excited to take?

Group 1:

Arts: Digital Photography.
Writing: Short Story Writing.
